

I am writing to urge you to not force all FM translator-based stations off the air because of LPFM. I enjoy having K-LOVE available to me as an alternative to the contention, idle talk, and general noise heard on many of the other stations. It makes my commute much more pleasant.

If K-LOVE were forced off, it would leave a definite hole in my station selections. K-LOVE plays an important role getting the word out regarding various community events that help people.

K-LOVE is an important alternative on the radio, providing positive programming that I can play in my car without worrying about the language or topic that might come up. As a parent this is very important to me.

I ask you to provide a way for translator stations such as K-LOVE to stay on the air and not be replaced by LPFM. Thank you.
